Contents Volume 204 (1998)

Foreword vii

Editorial Note viii

rRNA based identification and detection systems for rhizobia and other bacteria
W. Ludwig, R. Amann, E. Martinez-Romero, W. Schönhuber, S. Bauer, A. Neef and K.-H. Schleifer 1–19

Rapid identification of *Rhizobium* strains by targeted PCR fingerprinting
X. Perret and W.J. Broughton 21–34

Use of marker genes in competition studies of *Rhizobium*
A. Sessitsch, G. Hardarson, W.M. de Vos and K.J. Wilson 35–45

Isolation of unique nucleic acid sequences from rhizobia by genomic subtraction: Applications in microbial ecology and symbiotic gene analysis
J.E. Cooper, A.J. Bjourson, W. Streit and D. Werner 47–55

Potential of *Rhizobium* and *Bradyrhizobium* species as plant growth promoting rhizobacteria on non-legumes: Effect on radishes (*Raphanus sativus* L.)
H. Antoun, C.J. Beauchamp, N. Goussard, R. Chabot and R. Lalande 57–67

Competition in Kenyan soils between *Rhizobium leguminosarum* biovar *phaseoli* strain Kim5 and *R. tropici* strain CIAT899 using the *gusA* marker gene
B. Anyango, K. Wilson and K. Giller 69–78

Effects of host plant origin on nodulin activities and nitrogen fixation in *Phaseolus vulgaris* L.
V.M. Ceccatto, J.E. Gomes, G.A. Sarriés, D.H. Moon and S.M. Tsai 79–88

Symbiotic performance of some modified *Rhizobium etli* strains in assays with *Phaseolus vulgaris* beans that have a high capacity to fix N_2
E. Martínez-Romero, I. Hernández-Lucas, J.J. Peña-Cabriales and J.Z. Castellanos 89–94

Improvement of biological nitrogen fixation in Egyptian winter legumes through better management of *Rhizobium*
H. Moawad, S.M.S. Badr El-Din and R.A. Abdel-Aziz 95–106

Analysis of *Phaseolus–Rhizobium* interactions in a subsistence farming system
W.S. de Oliveira, L.W. Meinhardt, A. Sessitsch and S.M. Tsai 107–115

Contributions and limitations to symbiotic nitrogen fixation in common bean (*Phaseolus vulgaris* L.) in Romania
A. Popescu **117–125**

Detection of *Bradyrhizobium* spp. and *B. japonicum* in Thailand by primer-based technology and direct DNA extraction
N. Teaumroong and N. Boonkerd **127–134**

QTL mapping for nodule number and common bacterial blight in *Phaseolus vulgaris* L.
S.M. Tsai, R.O. Nodari, D.H. Moon, L.E.A. Camargo, R. Vencovsky and P. Gepts **135–145**

Nitrogen fixation and nodule occupancy by native strains of *Rhizobium* on different cultivars of common bean (*Phaseolus vulgaris* L.)
J. Vásquez-Arroyo, A. Sessitsch, E. Martínez and J.J. Peña-Cabriales **147–154**

Differential response of oilseed rape (*Brassica napus* L.) cultivars to low boron supply
J. Xue, M. Lin, R.W. Bell, R.D. Graham, X. Yang and Y. Yang **155–163**

Impacts of water input manipulations on fine root production and mortality in a mature hardwood forest
J.D. Joslin and M.H. Wolfe **165–174**

Effects of deforestation and cultivation on soil CEC and contents of exchangeable bases: A case study in Simlipal National Park, India
H. Saikh, C. Varadachari and K. Ghosh **175–181**

Modelling competition for water in intercrops: theory and comparison with field experiments
H. Ozier-Lafontaine, F. Lafolie, L. Bruckler, R. Tournebize and A. Mollier **183–201**

Root recolonization of previous root channels in corn and alfalfa rotations
D.P. Rasse and A.J.M. Smucker **203–212**

Effects of soil moisture content and temperature on methane uptake by grasslands on sandy soils
A. van den Pol-van Dasselaar, M. L. van Beusichem and O. Oenema **213–222**

Amounts of winter or summer rain triggering germination and 'the point of no return' of seedling desiccation tolerance, of some *Hordeum spontaneum* local ecotypes in Israel
Y. Gutterman and S. Gozlan **223–234**

Rates of nitrogen mineralization across an elevation and vegetation gradient in the southern Appalachians
J.D. Knoepp and W.T. Swank **235–241**

The effectivity of arbuscular mycorrhizal fungi from high input conventional and organic grassland and grass-arable rotations
J. Scullion, W.R. Eason and E.P. Scott **243–254**

Volume Contents **255–257**

Author Index **258**

Instructions to authors **259–261**
